

PNEUMATIC VACUUM SANDING SYSTEMS

CE ATEX 94/9/CE II 2/3 D

CNC-2

MAXIMA

Powerful industrial vacuum for professional use, particularly where use of electric equipment is hazardous.

- The systems are static-dissipating and conductive (including vacuum/exhaust hose). No risks of sparks.
- For Use on all Metallic (e.g.: Aluminum, Magnesium, Titanium, Commercial Alloys) and Non-Metallic Surfaces (e.g.: Wood, Plastics).
- Very low working pressure/air consumption: AIRFLUX vacuum device works effectively between 1 and 4 bar (15-60psi).
- No energy cost and completely noiseless when used with MAXIMA air sander.
- By using MAXIMA air sander, vacuum starts automatically with startup of tool.
- No technical assistance or maintenance required.
- Top of cart and three shelves for handy storage of tools, accessories, abrasives and more.
- Various configurations to meet all specific demands.
