

TP-48

TPMS DIAGNOSTIC TOOL

The TP48 is TOPDON's latest TPMS Service Tool that allows you to activate, read, diagnose and service all major OEM and aftermarket sensor brands. This tool expands on the robust features of the TP47 by offering new software features such as OBDII capabilities, OBDII relearning procedures, and Sync ID. Other software features include the ability to perform ECU unlocking and placard adjustments, and the new programming feature lets users retrieve vehicle IDs from the ECU. The wider compatibility of the TP48 will make your work process smoother, servicing all your customers with just one device. With this product, technicians will get the reliable data needed to better serve their clients, such as sensor IDs, pressure, temperature, battery status, and more.
